Steelcraft *by Mahadev Steel Industries*

Precision-engineered steel fabrication, modular furniture, and custom metal solutions for residential, commercial, industrial and institutional clients across India.

/Steelcraftworks

Who We Are

SteelCraft is a precision manufacturing brand under Mahadev Steel Industries, established in 2017. We specialize in delivering high-quality steel furniture, modular solutions, precision-fabricated components, and customized metal products for a wide range of applications.

With advanced CNC technology, in-house engineering design support, and a Gema Switzerland powder coating facility, SteelCraft combines engineering excellence with quality management practices aligned with ISO 9001:2015 standards.

Our 19,500 Sq. Ft. manufacturing facility in Lakhanmajra, Rohtak is equipped with state-of-the-art machinery capable of handling everything from precision thin-sheet work to heavy structural fabrication.

Meet our Founder

Mr. Ravinder Rathee (Founder & Owner) leads the organization with a clear vision and strong industry expertise. He built a solid technical foundation through his studies at the Central Training Institute, Chennai, where he gained in-depth knowledge of the science and practical applications of the field. He further strengthened his experience while serving as a Training Officer with the Department of Skills Development & Industrial Training, Haryana.

Driven by an entrepreneurial spirit, he later established his own venture in the steel industry, with a focus on delivering superior quality products and exceptional customer service. Under his leadership, the company has introduced its own brand Steelcraft, reflecting a commitment to excellence and innovation.

Since its inception, the organization has successfully served over 9,000 clients, a testament to its reliability, product quality, and customer-centric approach. This growing client base highlights the trust the company has built and its consistent ability to meet diverse customer needs.

OUR DIRECTION

To become India's most trusted and innovative manufacturer of precision-engineered steel products by delivering superior quality, advanced technology, and customized fabrication solutions for industrial, commercial, institutional, and infrastructure projects.

- Manufacture premium-quality steel products using advanced manufacturing technology.
- Deliver customized fabrication solutions tailored to every client's requirements.
- Ensure consistent quality, competitive pricing, and on-time delivery.
- Build long-term relationships through trust, innovation, and customer satisfaction.
- Continuously improve our processes, products, and manufacturing capabilities.

Our Advantage

Built on technical depth, trusted materials, and manufacturing excellence.
here is why industry leaders choose us.

1

Since 2017

Established manufacturing experience with proven track record across institutional, industrial, and residential projects.

2

ISO 9001:2015

Quality management certified parent company. Mahadev Steel Industries. Every process aligned with international standards.

3

CNC Laser + Plasma Cutting

Advance fibre laser and plasma cutting for any material and higher thickness.

4

Gema Switzerland Coating

In-house world-class powder coating plant with sand blasting pre-treatment. superior finish every time.

5

Lab Furniture Experts

Strong expertise in research and educational laboratory furniture — trusted by universities and institutions.

6

Govt. Project Ready

Capability to execute CPWD & PWD government institutional orders — compliant quality and delivery standards.

7

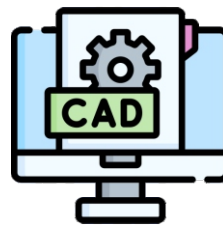

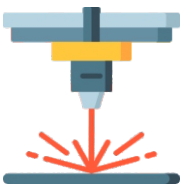

In-house Engineering Design

SolidWorks 3D, AutoCAD, and CorelDRAW design capability for accurate customization and faster project approvals.

8

Trusted Raw Materials

Tata, JSW, POSCO, JSL (Jindal) — only premium certified brands for HR, CRCA, GI, GPSP, SS, and Aluminium.

Why Choose us!

**We procure Raw Materials from
Trusted Brands Only**

**TATA
STEEL**

**AM/NS
INDIA**

ArcelorMittal Nippon Steel India

JINDAL STAINLESS

THEN WE PROCESS WITH HIGH END MACHINERY

WHAT WE DO ?

CNC Laser Cutting

Accurate sheet cutting with clean edges and complex profile capability. excellent dimensional accuracy.

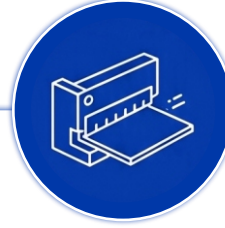

Minimal edge burr

CNC Bending

Precision bending for consistent shapes and structural accuracy. High repeatability for batch and institutional orders.

100 MT × 3 Meter

CNC Shearing

High-speed sheet cutting with dimensional consistency. Straight-line cutting for batch production workflows.

Up to 3 Meter

Plasma Cutting

CNC plasma profile cutting for heavy plates, structural fabrication parts, base plates and industrial components.

MS Plates

Powder Coating

Gema Switzerland technology for superior finish, strong adhesion, and long-term corrosion resistance on all metal surfaces.

Oven: 12×5×7 Ft

Custom Job Work

End-to-end fabrication support for OEMs, contractors and industrial clients. Batch and large institutional project orders.

0.6mm – 16mm

Cut to Length

Accurate strip cutting for repeat production. Channel strips, stiffeners, supports and modular component preparation.

600mm Width

Engineering Design

In-house product development and project drawing support. SolidWorks 3D, AutoCAD, and CorelDRAW capability.

Design Ready

OUR SERVICES

MAJOR MACHINERY

1

Hindustan Hydraulic CNC Press Brake

Working Length: 3 Meter · High repeatability and angular precision for medium to heavy-duty work

2

Apex CNC Fiber Laser Cutting Machine

Bed: 1.5×3 Meter · Materials: CRCA, HR, GI, SS, Aluminium · Optimized nesting for material saving

3

Plasma Cutting Machine — CNC Profile

Materials: Mild Steel, HR Sheets, Structural Plates · Economical heavy fabrication cutting

4

Energy Mission CNC Shearing Machine

Working Length: 3 Meter · Thickness: Up to 4mm · Programmable precision shearing for batch production

5

Hydro Pneumatic C-Frame Machine — 4 Ton

Capacity: 4 Ton · Application: Press fitting, light forming, punching and assembly support

6

Power Press — 10 MT

Capacity: 10 MT · Operations: Punching, slotting, forming, embossing · Brackets, enclosures, support structures

7

CNC Cut-to-Length Machine — 600mm Width

Strip Width: 600mm · High productivity with uniform repeat-length accuracy for modular component preparation

Welding & Tools

- CNC Laser Welding
- MIG Welding Sets

- TIG Argon Welding
- Arc Welding

- Pillar Drill (25mm)
- Tapping Machine

- Grinding Tools
- Assembly Tools

OUR INFRASTRUCTURE

WHAT WE MAKE?

Door & Window Frames

Pressed steel frames with dimensional accuracy, corrosion resistance, and easy installation for residential, commercial & industrial projects.

Storage Furniture

Steel Almirah, Storage Racks, Office Storage Units, File Cabinets & Industrial Storage Systems designed for strength and long service life.

Modular Kitchen

Modern, space-efficient modular kitchen structures manufactured with precision metal frameworks for durability and long-term performance.

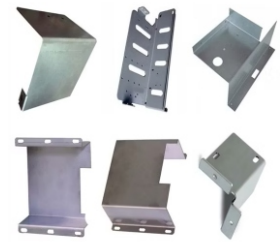

Lab Furniture

Specialized laboratory furniture for research institutions, testing labs & educational institutes. Lab Tables, Workstations, Custom Structures.

Electrical Panels & Boxes

Precision-fabricated Control Boxes, Junction Boxes, Distribution Boxes & Battery Boxes manufactured as per required specifications.

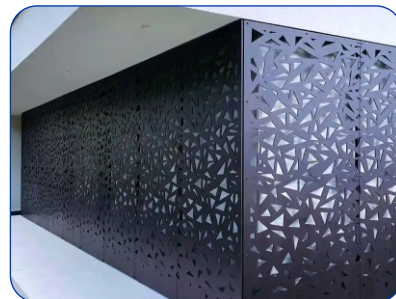

Custom Metal Products

Tailor-made metal products designed and manufactured as per client drawings and requirements for industrial and commercial use.

Lithium Battery Boxes

Custom lithium battery boxes with high safety, durability, and optimized thermal performance.

Laser Cut Panels

Precision laser-cut panels with clean finish and detailed profiling for custom applications
